

## NYC School Construction Authority - various

**Featured Above:** PS340A, PS19X

**Client:** NYC School Construction Authority

**Completion:** 2013-ongoing

Acoustical review of school projects for SCA typically includes:

- Classroom sound separation, partition and door construction designed to meet NYC SCA Green Schools Guide acoustical pre-requisite
- Reverberation time analysis of multi-function auditorium spaces
- Design of isolated constructions to meet stacking and/or horizontal adjacency concerns at gymnasias and/or music classrooms
- Interior acoustic review and analysis of all spaces, with surface finish quantity, type and placement as needed to meet GSG requirements
- HVAC and mechanical systems serving core learning spaces reviewed to include sufficient sound attenuation to meet the background noise level requirements in GSG

Longman Lindsey SCA projects include:

- SCA-D75 Pre-K
- SCA-K678
- SCA-UPK Queens Boulevard
- SCA-UPK 43<sup>rd</sup> Avenue LIC
- SCA PS-19X
- PS 375Q
- PS K671
- PS 340A/X448
- PS 730K
- IS K680
